ABOUT ME

I am a Front-End and Software Engineer specializing in responsive web and mobile applications with React, React Native, and Flutter. I bring strong expertise in Software Quality Assurance, covering both manual and automation testing with Selenium, Postman, and Jira. I have developed skills and interests in business and digital domains such as business engineering, project management, social media management, and operations analysis. My background also includes IT operations, system troubleshooting, and automation with Python. Alongside my technical expertise. I am proficient in data analysis using MS Excel (including VBA) and skilled in creative design with Adobe Photoshop and Illustrator, making me a versatile professional with a strong balance of development, quality assurance, and business-focused skills.
